12. 2 2008 ASHRAE Handbook — HVAC Systems and Equipment. Wspace or process with hot or chilled water are frequently called hydronic systems. Water flows through piping that connects a boiler, water heater, or chiller to suitable terminal heat transfer units located at the space or process. Water systems can be classified by (1) operating temperature, (2) flow generation, (3) pressurization, (4) piping arrangement, and (5) pumping arrangement.
