In the early days of electrification, so many frequencies were used that no single value prevailed (London in 1918 had ten different frequencies). As the 20th century continued, more power was produced at 60 Hz (North America) or 50 Hz (Europe and most of Asia). Standardization allowed international trade in electrical equipment. Much later, the use of standard frequencies allowed interconnection of power grids.

The 60th parallel north is a circle of latitude that is 60 degrees north of Earth's equator. It crosses Europe, Asia, the Pacific Ocean, North America, and the Atlantic Ocean. Although it lies approximately twice as far away from the Equator as from the North Pole, the 60th parallel is half as long as the Equator line. This is where the Earth bulges halfway as much as on the Equator.

60th parallel north - Wikipedia

North America and Japan use 110V/60Hz electricity where as rest of the world use 220V/50Hz. The reason was historical. Engineers in USA originally laid lines for 110 V where as in Europe they did with 220 V. After that, it would have been too expensive to change the system. Neither system is inferior nor superior□

Why Europe/Asia use 220V/50 Hz but USA uses 110V/60 Hz ...
