Reinforcement

The term

reinforce means

to strengthen,

and is used in

psychology to

refer to any

# Download Ebook Chapter Reinforcement

stimuli which strengthens or increases the probability of a specific response. For example, if you want your dog to sit on command, you may give him a treat every time he sits for you.

Abstract. In this chapter, we introduce and summarize the taxonomy and categories for reinforcement learning (RL) algorithms.

Figure 3.1 presents an overview of the

# Download Ebook Chapter Reinforcement

typical and popular algorithms in a structural way. We classify reinforcement learning algorithms from different perspectives, including model-based and model-free methods, value-based and

# Download Ebook Chapter Reinforcement

methods (or combination of the two), Monte Carlo methods and temporal-difference methods, on-policy and off-policy methods.

## **Taxonomy of Reinforcement Learning**
