"English is so illogical!" It is generally believed that English is a language of exceptions. For many, learning to spell and read is frustrating. For some, it is impossible... especially for the 29% of Americans who are functionally illiterate. But what if the problem is not the language itself, but the rules we were taught? What if we could see the complexity of English as a powerful tool rather than a hindrance? --Denise Eide Uncovering the Logic of English challenges the notion that English is illogical by systematically explaining English spelling and answering questions like "Why is there a silent final E in have, large, and house?" and "Why is discussion spelled with -sion rather than -tion?" With easy-to-read examples and anecdotes, this book describes: - the phonograms and spelling rules which explain 98% of English words - how English words are formed and how this knowledge can revolutionize vocabulary development - how understanding the reasons behind English spelling prevents students from needing to guess The author's inspiring commentary makes a compelling case that understanding the logic of English

could transform literacy education and help solve America's literacy crisis. Thorough and filled with the latest linguistic and reading research, Uncovering the Logic of English demonstrates why this systematic approach should be as foundational to our education as 1+1=2.

This intuitive yet rigourous introduction derives the core results of digital communication from first principles. Theory, rather than industry standards, motivates the engineering approaches, and key results are stated with all the required assumptions. The book emphasizes the geometric view, opening with the inner product, the matched filter for its computation, Parseval's theorem, the sampling theorem as an orthonormal expansion, the isometry between passband signals and their baseband representation, and the spectral-efficiency optimality of quadrature amplitude modulation (QAM). Subsequent chapters address noise, hypothesis testing, Gaussian stochastic processes, and the sufficiency of the matched filter outputs. Uniquely, there is a treatment of white noise without generalized functions, and of the power spectral density without artificial random jitters and random phases in the analysis of QAM. This systematic and insightful book, with over 300 exercises, is ideal for graduate courses in digital communication, and for anyone asking 'why' and not just 'how'.

In today's dynamic global business environment where knowledge is a main asset and learning becomes the most important process, Business Education needs to employ the right practices to develop future leaders. Businesses require graduates that become true experts. But can business schools indeed create learning experiences that address the needs of the global marketplace? Can they teach students to build learning organizations? The articles in this volume detail successful approaches developed by business educators and researchers. The approaches have been implemented to solve real problems and to provide students with the ethical and analytical abilities they will need to both compete and contribute to the betterment of others. The thematic part of this volume focuses on the potential of interactive on-line activities to promote business and economics education. They demonstrate the benefits that learning technologies can bring and show how to overcome potential problem issues.

This book constitutes the refereed proceedings of the 7th Conference on Electronic Governance and Open Society: Challenges in Eurasia, EGOSE 2020, held in St. Petersburg, Russia, in November 2020. The 35 full papers and 5 short papers were carefully reviewed and selected from 59 submissions. The papers are organized in topical sections on digital government: services, policies, laws, practices, surveillance; digital society: openness, participation, trust, competences; digital data: data science, methods,

modelling, AI, NLP.

Now in its 29th edition, the Europa International Foundation Directory 2020 provides an unparalleled guide to the foundations, trusts, charitable and grantmaking NGOs, and other similar not-for-profit organizations of the world. It provides a comprehensive picture of third sector activity on a global scale. Users will find names and contact details for some 2,690 institutions worldwide. This new edition has been revised and expanded to include the most comprehensive and up-to-date information on this growing sector. Indexes allow the reader to find organizations by area of activity (including conservation and the environment, science and technology, education and social welfare) and geographical region of operations (e.g. South America, Central America and the Caribbean, Australasia, Western Europe and North America). Contents include: A comprehensive directory section organized by country or territory; Details of co-ordinating bodies, and of foundations, trusts and non-profit organizations; A full index of organizations, and indexes by main activity and by geographical area of activity.

Hvert andet minut døgnet rundt dør en kvinde på grund af komplikationer i forbindelse med graviditet og fødsel. Det er mere end 300.000 kvinder om året, over 800 hver dag. Heldigvis er der nogle, der arbejder for deres sag. For Maternity Foundation er en skarp hjerne og et varmt hjerte ikke hinandens modsætninger, men tværtimod hinandens forudsætninger. Organisationen skaber digitale redskaber og innovative træningsmetoder, som hele verdens jordemødre og fødselshjælpere bruger i deres hverdag. Fokus er hele tiden på at skabe mere sundhed for kvinder og børn for færre penge, til glæde for flere og med teknologien som hjælp. DET MÅ IKKE KOSTE LIV AT GIVE LIV er historien om Maternity Foundation, der startede med fem idealistiske kvinder omkring et køkkenbord, og i dag, 15 år senere, er en vigtig international spiller i indsatsen for kvinders og børns sundhed, med H.K.H. Kronprinsesse Mary som protektor. For hvert solgt eksemplar af bogen doneres 100 kr. til Maternitys arbejde.

Media and Migration: Learning in a globalized world brings together studies located at the intersection of migration, media and learning, and considers how the learning practices of youth in migration are shaped by new media. The change in the mobilities of people, media, and material goods which allow new connections between 'global' and 'local' life has had a significant impact on contemporary migration, as well as social life more generally. The contributors to this book show how learning trajectories of individual learners become defined by broadly distributed networks and knowledge systems. Learning in stable, closed, and culturally uniform settings is becoming the exception rather than the norm. While immigrant youth are often associated with juggling multiple lives or worlds, such juggling is increasingly becoming typical for all youth living with new media. The book therefore addresses youth

learning more generally in relation to media, globalization, and diversity, as well as the digital learning practices of immigrants and non-immigrants. This book was originally published as a special issue of Learning, Media and Technology.

Installationskunsten har gået sin sejrsgang verden over, og er her i det 21. århundrede en både vel- og anerkendt bestanddel af samtidskunsten. Med påvirkning fra og udveksling mellem billedkunst på den ene side og performanceteater på den anden befinder installationskunst sig - som bogens titel viser - netop i feltet mellem billede og scene. I Installation Art: Between Image and Stage undersøger Anne Ring Petersen grundstenene for en af nutidens mest udbredte kunstformer. Installationer er - ligesom skulpturer - tredimensionelle formationer eller billeddannelser, men i modsætning til skulpturen er installationen karakteriseret ved at være formet af rum eller rumlige scenografier, som skaber betydning og sanseoplevelser gennem sit billedsprog. Som resultat af dette er installationer ofte stort anlagte kunstværker, som beskueren kan gå ind i, og de lever dermed til fulde op til nutidens krav om spektakulære, æstetisk iscenesatte events og kulturoplevelser, der taler til sanserne. Gennem grundige analyser af værker af kunstnere som Bruce Nauman, Olafur Eliasson, Jeppe Hein, Mona Hatoum, Pipilotti Rist og Ilya Kabakov som bagtæppe søges der i denne bog svar på, hvad en installation egentlig er, hvilke virkemidler den bruger, hvordan installationskunstens opståen kan forklares i et kulturhistorisk perspektiv og meget mere. Også installationskunstens rumlige, tidsmæssige og diskursive aspekter såvel som dens receptionsæstetik, der sættes ind i en overordnet kunst- og kulturhistorisk ramme, undersøges. Installation Art: Between Image and Stage er et nyttigt værk for alle, der ønsker at forstå denne mangefacetterede kunstforms konceptuelle fundament. Anne Ring Petersen, dr.phil., er lektor ved Institut for Kunst og Kulturvidenskab, Københavns Universitet. Har i 2009 udgivetInstallationskunsten mellem billede og scene og er redaktør af Contemporary Painting in Context (2010). Despite its large and growing popularity — to say nothing of its near- ubiquity in the world's art scenes and international exhibitions of contemporary art — installation art remains a form whose artistic vocabulary and conceptual basis have rarely been subjected to thorough critical examination. In Installation Art: Between Image and Stage, Anne Ring Petersen aims to change that. She begins by exploring how installation art developed into an interdisciplinary genre in the 1960s, and how its intertwining of the visual and the performative has acted as a catalyst for the generation of new artistic phenomena. She investigates how it became one of today's most widely used art forms, increasingly expanding into consumer, popular and urban cultures, where installation's often spectacular appearance ensures that it meets contemporary demands for sense-provoking and immersive cultural experiences. The main trajectory of the book is directed by a movement aimed at addressing a series of basic questions that get at the heart of what installation art is and how it is defined: How does installation structure time, space and

representation? How does it address and engage its viewers? And how does it draw in the surrounding world to become part of the work? Featuring the work of such well-known artists as Bruce Nauman, Pipilotti Rist, Ilya Kabakov and many others, this book breaks crucial new ground in understanding the conceptual underpinnings of this multifacious art form. Anne Ring Petersen is associate professor in the Department of Arts and Cultural Studies at the University of Copenhagen and the editor of Contemporary Painting in Context.

PMBOK&® Guide is the go-to resource for project management practitioners. The project management profession has significantly evolved due to emerging technology, new approaches and rapid market changes. Reflecting this evolution, The Standard for Project Management enumerates 12 principles of project management and the PMBOK&® Guide &- Seventh Edition is structured around eight project performance domains.This edition is designed to address practitioners' current and future needs and to help them be more proactive, innovative and nimble in enabling desired project outcomes.This edition of the PMBOK&® Guide:•Reflects the full range of development approaches (predictive, adaptive, hybrid, etc.);•Provides an entire section devoted to tailoring the development approach and processes;•Includes an expanded list of models, methods, and artifacts;•Focuses on not just delivering project outputs but also enabling outcomes; and• Integrates with PMIstandards+™ for information and standards application content based on project type, development approach, and industry sector.
