Ip Telephony 2 Mikrotik - princess.kingsbountygame.com
To this, i logged into the Mikrotik router with winbox and went to IP tab. I chose routes from the drop down menu. The rest was self explanatory. After configuring it, i pulled the cable from ISP1 and PCs on the LAN were still able to surf the internet. I ran a traceret 4.2.2.2 which returned the backup ISP's router. I plugged the cable from ...

Assume that we have 2 mikrotik's.The first mikrotik is a AP (access point) and the second mikrotik is a wireless client (wlan1) that is connected via lan to you'r computer. And you wanna connect to a AP (Access Point) with wireless client card (wlan1) but because we can't bridge wireless client and ethernet, we must build a routing protocol.
