This first volume of the three-volume set (CCIS 1193, CCIS 1194, and CCIS 1195) constitutes the refereed proceedings of the First International Conference on Applied Technologies, ICAT 2019, held in Quito, Ecuador, in December 2019. The 124 full papers were carefully reviewed and selected from 328 submissions. The papers are organized according to the following topics: technology trends; computing; intelligent systems; machine vision; security; communication; electronics; e-learning; e-government; e-participation.

"This deeply researched, engagingly presented, and immensely valuable book demolishes longstanding myths about Mexican California as a colorful, custom-bound world apart. In place of this fantasy past, Louise Pubols offers a history of the de la Guerras that reveals a family and a society caught up in, yet not wholly overcome by, the global economic and political developments of the first half of the nineteenth century." —Stephen Aron, Professor of History at the University of California, Los Angeles, and Executive Director of the Institute for the Study of the American West at the Autry National Center "The Father of All combines first-rate historical analysis with in-depth archival research. Don José de la Guerra and his extended family are fascinating historical personages, and their encounters with other Californio elites provide a compelling story, but Pubols takes us to a higher level of understanding by demonstrating the crucial role of extended family ties in the economic and political history of California during the Mexican Period. Pubols provides a convincing argument that family ties kept the prevalent political unrest from breaking out into more violent civil conflict." —Dr. Jarrell C. Jackman, Executive Director, Santa Barbara Trust for Historic Preservation

This book constitutes the proceedings of the 1st International Conference on Systems and Information Sciences (ICCIS), held in Manta, Ecuador, from July 27 to 29, 2020, and was jointly organized by Universidad Laica Eloy Alfaro de Manabi "ULEAM", in collaboration with GDEON. ICCIS aims to bring together systems and information sciences researchers and developers from academia and industry around the world to discuss cutting-edge research. The book covers the following topics: AI, Expert Systems and Big Data Analytics Cloud, IoT and Distributed Computing Communications Database System and Application Financial Technologies (FinTech), Economics and Business Engineering m-Learning and e-Learning Security Software Engineering Web Information Systems and Applications General Track

Written by one of America's preeminent labor historians, this book is the definitive account of one of the most spectacular, captivating, complex and strangely neglected stories in Western history--the emergence of migratory farmworkers and the development of California agriculture. Street has systematically worked his way through a mountain of archival materials--more than 500 manuscript collections, scattered in 22 states, including Spain and Mexico--to follow the farmworker story from its beginnings on Spanish missions into the second decade of the twentieth century. The result is a comprehensive tour de force. Scene by scene, the epic narrative clarifies and breathes new life into a controversial and instructive saga long surrounded by myth, conjecture, and scholarly neglect. With its panoramic view spanning 144 years and moving from the US-Mexico border to Oregon, Beasts of the Field reveals diverse patterns of life and labor in the fields that varied among different crops, regions, time periods, and racial and ethic groups. Enormous in scope, packed with surprising twists and turns, and devastating in impact, this compelling, revelatory work of American social history will inform generations to come of the history of California and the nation.

Intelligent Environments (IEs) aims to empower users by enriching their experience, raising their awareness and enhancing their management of their surroundings. The term IE is used to describe the physical spaces where ICT and pervasive technologies are used to achieve specific objectives for the user and/or the environment. The growing IE community, from academia and practitioners, is working on the materialization of IEs driven by the latest technological developments and innovative ideas. This book presents the proceedings of the workshops held in conjunction with the 16th International Conference on Intelligent Environments (IE2020), Madrid, Spain, 20-23 July 2020. The conference focused on the development of advance intelligent environments, as well as newly emerging and rapidly evolving topics. The workshops included here emphasize multi-disciplinary and transverse aspects of IE, as well as cutting-edge topics: 10th International Workshop on Intelligent Environments Supporting Healthcare and Well-being (WISHWell'20); 9th International Workshop on the Reliability of Intelligent Environments (WoRIE2020); 4th International Workshop on Legal Issues in Intelligent Environments (LIIE'20); 4th International Workshop on Intelligent Systems for Agriculture Production and Environment Protection (ISAPEP'20); 4th International Workshop on Citizen-Centric Smart Cities Services (CCSCS'20); 2nd International Workshop on Intelligent Environments and Buildings (IEB'20); 1st International Workshop on Research on Smart Grids and Related Applications (SGRA'20); 1st International Workshop on Open and Crowdsourced Location Data (ISOCLoD'20); 1st International Workshop on Social Media Analysis for Intelligent Environment (SMAIE'20). The proceedings contain contributions reflecting the latest research developments in IEs and related areas, focusing on stretching the borders of the current state of the art and contributing to an ever-increasing establishment of IEs in the real world. It will be of interest to all those whose work involves the design or application of Intelligent Environments.

Serial killers captivate audiences in songs, books, and movies.Many fictional serial killers, like Leatherface from the movies "The Texas Chainsaw Massacre" or Buffalo Bill from "The Silence of the Innocents", are based on real killers;Ed Gein, for example, in these movies.Despitethe differences between historical serial killers, many of these criminals share the same traits. To carry out criminal profiling, the profiler must analyze various elements of the crime, including the analysis of the crime scene. This book aims to take a closer look at this analysis, showing what the phases would be, the questions that must be asked and the information that can be extracted for the elaboration of the profiling.The typology of crime scenes, police and forensic work and their analysis for profiling are shown. We also show a crime scene classification widely used by the FBI.

The term Intelligent Environments (IEs) refers to physical spaces in which IT and other pervasive computing technologies are combined and used to achieve specific goals for the user, the environment, or both. The ultimate objective of IEs is to enrich user experience, improve management of the environment in question and increase user awareness. This book presents the proceedings of the following workshops, which formed part of the 12th International Conference on Intelligent Environments (IE16), held in London, UK, in September 2016: the 5th International Workshop on Smart Offices and Other Workplaces (SOOW'16); the 5th International Workshop on the Reliability of Intelligent Environments (WoRIE'16); the 1st International Workshop on Legal Issues in Intelligent Environments (LIIE'16); the 2nd International Symposium on Future Intelligent Educational Environments and Learning (SOFIEE'16); the 2nd International Workshop on Future Internet and Smart Networks (FI&SN'2016); the International Workshop on Intelligent Environments Supporting Healthcare and Well-being (WISHWell'2016); the International Workshop on Computation Sustainability, Technologies and Applications (CoSTA'2016); the Creative Science 2016 (CS'16) and Cloud-of-Things 2016 (CoT'16); the Workshop on Wireless Body Area Networks for Personal Monitoring in Intelligent Environments (WBAN-PMIE); and the Physical Computing Workshop. The workshops focused on the development of advanced intelligent environments, as well as newly emerging and rapidly evolving topics, emphasizing the multi-disciplinary and transversal aspects of IEs, as well as cutting-edge topics. The book will be of interest to all those whose work involves them in the use of intelligent environments.

A Companion to Renaissance and Baroque Art provides adverse, fresh collection of accessible, comprehensive essaysaddressing key issues for European art produced between 1300 and1700, a period that might be termed the beginning of modernhistory. Presents a collection of original, in-depth essays from artexperts that address various aspects of European visual artsproduced from circa 1300 to 1700 Divided into five broad conceptual headings: Social-HistoricalFactors in Artistic Production; Creative Process and Social Statureof the Artist; The Object: Art as Material Culture; The Message:Subjects and Meanings; and The Viewer, the Critic, and theHistorian: Reception and Interpretation as Cultural Discourse Covers many topics not typically included in collections ofthis nature, such as Judaism and the arts, architectural treatises,the global Renaissance in arts, the new natural sciences and thearts, art and religion, and gender and sexuality Features essays on the arts of the domestic life, sexuality andgender, and the art and production of tapestries,conservation/technology, and the metaphor of theater Focuses on Western and Central Europe and that territory'sinteractions with neighboring civilizations and distantdiscoveries Includes illustrations as well as links to images not includedin the book

A major new introduction to the global history of Christianity.written by one of the world's leading theologians and authorof numerous bestselling textbooks. Provides a truly global review by exploring the development ofChristianity and related issues in Asia, Latin America and Africa,and not just focusing on Western concerns Spanning more than two millennia and combining elements oftheology, history, and culture, it traces the development of allthree branches of Christianity – Catholic, Protestant, andOrthodox – providing context to Christianity's originsand its links to Judaism Looks beyond denominational history at Christianity's impacton individuals, society, politics, and intellectual thought,as well as on art, architecture, and the natural sciences Combines McGrath's acute historical sensibility withformidable organizational skill, breaking the material down intoaccessible, self-contained historical periods Offers an accessible and student-oriented text, assuming littleor no advance theological or historical knowledge on the part ofthe reader
