But until now, it only had support through either code or canvas apps. Which means there was not an option to provide any sort of UI for the user to upload/download files to this attribute through model driven apps which actually hindered its adoption.

*File and Image type attributes now supported in Model ...*

Each file type has one or more corresponding file extensions. For example, JPEG image files may be saved with a .JPG or .JPEG extension, while Adobe Photoshop image files are saved with a .PSD extension. The file extension appended to the end of each filename provides a simple way of identifying the file type of each file.
