The Philosopher and the Wolf is a philosophical memoir about a man's life and what he learned about it by living with a wolf for over a decade. Ultimately, however, the book is a philosophical reflection on the human condition.

A beautiful heart warming and heart rending true tale of one man's love of and life with a wolf, Brenin, from the time when the wolf was a six week old cub to his death eleven years later. For eleven years the two were virtually inseparable. Animal stories instinctively have an appeal and this is no exception.

The wolf is the best part of this book! You have a philisopher living with a wolf and rambling on at times about philosophy, which made me want to skip ahead. I think this is a mostly true account, but it makes me realize some people (like this author) are dysfunctional members of society who rise to recognition and success in spite of themselves.

The charming and poignant story of the relationship between a philosophy professor and his pet wolf.

Mark Rowlands was a young philosophy professor, rootless and searching for life's greater meaning. Shortly after arriving at the University of Alabama, he noticed a classified ad in the local paper advertising wolf cubs for sale, and decided he had to investigate, if only out of curiosity. It was love at first sight, and the bond that grew between philosopher and wolf reaffirms for us the incredible relationships that exist between man and animal. When Mark welcomed his new companion, Brenin, into his home, but more than just an exotic pet, Brenin

“Most of the serious thinking I have done over the past twenty years has been done while running,” says philosophy professor Mark Rowlands, who has run for most of his life. And for him, running and philosophizing, are inextricably connected. In *Running with the Pack*, he reveals the most significant runs of his life—from the entire day he spent running as a boy in Wales, to the runs along French beaches and up Irish mountains with

Myshkin was born on a certain day and died on a certain day—and some things happened to him in between. These things presented him with ethical questions, and this book is a record of his attempt to answer those questions. Discovered in 2054 by his son after Myshkin's death in the Florida Keys, *A Good Life* is one man's reckoning with the life he has led and the choices he made. It is at once a philosophical handbook for living and a page-turning narrative, following one man's life (birth, death, education, religion, morality, illness,

debate between two standard positions. Incompatibilism holds that freedom and responsibility require causal and metaphysical independence from the impersonal forces of nature. According to compatibilism, people are free and responsible as long as their actions are governed by their desires. In *Freedom Within Reason*, Susan Wolf charts a path between these traditional positions: We are not free and responsible, she argues, for actions that are governed by desires that we cannot help having. But the wish to form our own desires from nothing is both futile and

arbitrary. Some of the forces beyond our control are friends to freedom rather than enemies of it: they endow us with faculties of reason, perception, and imagination, and provide us with the data by which we come to see and appreciate the world for what it is. The independence we want, Wolf argues, is not independence from the world, but independence from forces that prevent or preclude us from choosing how to live in light of a sufficient appreciation of the world. The freedom we want is a freedom within reason and the world.

Foot-and-mouth and mad-cow disease are but two of the results of treating animals as commodities, subject only to commercial constraints and ignoring all natural and moral considerations. Chickens hanging by their necks on conveyor belts, caged pigs with sores, bloated dead sheep with their legs in the air, mutilated dogs waiting to die after undergoing horrendous experiments in the name of science or just product-testing—these are some of the images that illustrate the indifference of a consumerist society to the suffering of animals. Few are willing to recognize

that the packaged, sanitized supermarket meat that materializes on their dinner tables every day is the result of an industrial process involving unimaginable pain and suffering. We would be horrified if our pets were harmed, yet every day we eat animals that have been tortured and executed. Mark Rowlands claims that it is simply unjust to harm animals. As conscious, sentient beings, biologically continuous with humans, they have interests that cannot simply be disregarded. Using simple principles of justice, he argues that animals have

moral rights, and examines the consequences of this claim in the contexts of vegetarianism, animal experimentation, zoos and hunting, and animal rights activism.

Most people, including philosophers, tend to classify human motives as falling into one of two categories: the egoistic or the altruistic, the self-interested or the moral. According to Susan Wolf, however, much of what motivates us does not comfortably fit into this scheme. Often we act neither for our own sake nor out of duty or an impersonal

concern for the world. Rather, we act out of love for objects that we rightly perceive as worthy of love--and it is these actions that give meaning to our lives. Wolf makes a compelling case that, along with happiness and morality, this kind of meaningfulness constitutes a distinctive dimension of a good life. Written in a lively and engaging style, and full of provocative examples, *Meaning in Life and Why It Matters* is a profound and original reflection on a subject of permanent human concern.
