The Unposted Letters is a platform that gives voice to the unheard with a belief that all stories matter. These are stories of the people, by the people and for the people. It ' s time to unzip those lips and break those walls we have surrounded ourselves in. Life is too short to be in box. Life is too short to remain jailed in our own hearts.

Design your destiny with spiritual empowerment from Mahatria Ra whose mission is to awaken humanity on the path of holistic knowledge. His pursuit has been to enable people to live on a higher pedestal practicable for everyone.

Letters written by the poet to an eight-year-old girl explain the difference between learning and knowing, the value of thinking, and the benefits of avoiding hypocrisy and pretension

Articles on conduct of life and personal growth.

'Magnificent, a true magnum opus....A tremendously important piece of work.... A truly revolutionary book (not merely an excellent book)' - Arun Ghosh Time is a mystery that has perplexed humankind since time immemorial. Resolving this mystery is of significance not only to philosophers and physicists but is also a very practical concern. Our perception of time shapes our values and way of life; it also mediates the interaction between science and religion both of which rest fundamentally on assumptions about the nature of time. C K Raju begins with a critical exposition of various time-beliefs, ranging from the earliest times through Augustine, Newton and Einstein to Stephen Hawking and current notions of chaos and time travel. He traces the role of organised religion in subverting time beliefs for its political ends. The book points out how this resulted in a facile dichotomy between 'linear' and 'cyclic' time, thereby inaugurating a confusion which, according to the author, has handicapped Western thought ever since, eventually influencing the content of science itself. Thus, this book daringly asserts that physical theory, traditionally regarded as amoral and objective, has depended on cultural beliefs about time. The author points out that time beliefs are again being manipulated today as the credibility of science is being exploited to promote a picture of time and, hence, a pattern of human behaviour which is convenient to the agenda of globalisation of culture. The linkages between modern theology and this 'brave new physics' are traced against the wider context of the so-called 'clash of civilisations', and the attempts to remake the world order. The conclusions point to the need to de-theologise time. The author challenges Einstein's understanding of relativity theory and suggests that a 'tilt in the arrow of time', or a small tendency towards cyclicity, will help repair the prevalent confusion about time. A 'tilt' also enables a physics that permits both memory and creativity, so that purpose and spontaneous growth of order are returned to human life. The book ends with a vision of Man as Creator, surprising God. Extensive research in physics, the history of science, comparative religions, and sociology lend weight to the important and challenging conclusions reached by the author. Written as a rejoinder to Stephen Hawking's A Brief History of Time, this book goes much further and, unlike any previous book, it gives a critical exposition of various world religions-Buddhism, Christianity, Hinduism, Islam, and Jainism-while exploring their intricate links, through time beliefs, to current physics on the one hand, and to global political and economic trends, on the other. This book will appeal to scholars and laypersons equally. It will fascinate anyone who reads it and will teach its readers to question the unquestionable.

Finally available in the United States, a singular story collection that Time Out declared "unsettlingly brilliant" Astudent's suicide note is not what it seems. A high school football rivalry turns absurd—and deadly. A much-loved cat seems to have been a different animal all along. A pair of identical twins aren't identical at all—or even related. A man finds his own yellowed birth announcement inside a bureau bought at auction. Set in a small upstate New York town, told in a conversational style, Pieces for the Left Hand is a stream of a hundred anecdotes, none much longer than a page. At once funny, bizarre, familiar, and disturbing, these deceptively straightforward tales nevertheless shock and amaze through uncanny coincidence, tragic misunderstanding, strange occurrence, or sudden insight. Unposted letters, unexpected visitors, false memories—in J. Robert Lennon's vision of America, these are the things that decide our fate. Wry and deadpan, powerful and philosophical, these addictive little tales reveal the everyday world as a strange and eerie place.

Everything that is happening right now is fate leading you to this moment. Do not seek a change in yourself, you are already blessed with everything you have got. Whatever you have thought is working out exactly the way you want, so let's just embrace the moment and let's thank all the positive vibes around you, everything is perfect, everything makes sense, don't be puzzled by the demons. You are exactly where you are meant to be, the people around you are there to see your growth, Your success, your failures, your heartbeat, and your heartbreak memories are worth living a beautiful life, the only regret you will have about yourself should be that you thought so less of you, and now that you have realized I want to thank you for being what you are. Because what matters above all is your happiness.

A scintillating collection of essays on language from one of literature's most supple minds In The Night Sky, her first work of essays, acclaimed poet Ann Lauterbach writes of the ways in which art and poetry are integral and necessary to human conversation. At the center of the book is a series of seven essays, by turns meditative and polemical, that articulate the interstices between Lauterbach's poetics and her experience. She advocates an active encounter with language, at once imaginative and practical, and argues for the importance of art to the well-being of a democratic society. Lauterbach's "nimble and glittering" (Booklist) writings bring us to a new understanding of the relationship between self-knowledge and cultural meaning, as well as demonstrating the ways in which contemporary philosophy and theory might be integrated with practical knowledge.
